What Thrive's share supports

Your 40% share rewards you for introducing new customers to Thrive. Thrive's 60% share helps fund course creation and updates, platform running costs, student support, and the training and resources provided to referral partners. This allows you to focus on promoting a learning experience that we build, maintain and deliver.

Illustration only; check the current price. After discounts and refunds, Thrive reserves 20%, then splits the remainder 40% / 60%. Rounded to pennies. The reserve does not pay your personal tax.

30 days

Hold starts after **both payment and access** are confirmed, from whichever happens later.

Bank arrival

Bank processing or security checks can delay arrival. Check your payment status and history.

Refunds or disputes? Commission may be held or reduced. Amounts already paid are offset against future commission; balances carry forward.

READY TO SHARE

Keep it clear. Make it yours.

20%

OFF THE COURSE

Your customer gets the discount; you earn on confirmed, attributed course purchases. Calls, products, delivery and self-referrals are excluded.

How should I share my code?

Copy your link or code from your partner space. Check enrolment is open before promoting it. Ask customers to check the code and discount in their basket before paying.

30-day attribution: a signed-in customer can attach a referral to their account. Their latest chosen code applies. A click alone does not guarantee commission; a code applied at checkout determines that purchase.

MAKE THE RELATIONSHIP OBVIOUS
